

10 THINGS YOUR CUSTOMERS WANT IN THEIR PAYABLES PROCESS

DOES YOUR SOLUTION DO THIS?

1 PAY ANYONE ANYWHERE INSTANTLY USING DIGITAL WALLETS

Wallet-to-wallet payments are both simple and instant.

2 LOWER THE COST OF GLOBAL PAYMENTS FOR YOU AND YOUR CUSTOMERS

Digital wallets enable faster and cheaper payments bypassing traditional financial institutions (banks) and card processing networks.

3 DYNAMICALLY ADD NEW PAYEES FROM WORKFLOWS

Business workflows powered by APIs enable automated provisioning of new accounts — all that's needed is an email address to start.

4 COMPLY WITH ALL KYC AND AML REGULATORY ISSUES

Compliance is automated with multiple layers of security and account limits.

5 AUTOMATICALLY GENERATE 1099'S AS NEEDED

Not every payment requires tax reports but when they do, using a payments platform enables you to transfer the obligation and eliminate the cost.

6 EMBED PAYMENT DISTRIBUTION INSIDE YOUR APP SOFTWARE

Integrating payment distribution into your app or software adds value to your customers and revenue to your bottom line.

7 FACILITATE MULTI-TIER REVENUE SHARING

Automating complex payment distribution work flows can simplify partner payments and accelerate collaboration.

8 HELP PAYEES SKIP CARD PROCESSING FEES

Paying with credit cards creates a cost your supplier doesn't need to bear when using digital wallet payments.

9 ENABLE PAYEES TO LINK THEIR BANKS DIRECTLY, ELIMINATING THE NEED FOR YOU TO STORE OR MAINTAIN ANY PERSONAL INFORMATION

Why store sensitive data when using self-serve tools enables payees to direct the funds to their bank account or multiple bank accounts.

10 LET PAYEES DETERMINE HOW AND WHEN THEY'D LIKE TO RECEIVE THEIR FUNDS

With Xtrm Choice™ payees can choose to transfer funds from their digital wallet to their bank (optional Rapid Bank Transfer for instant access), Virtual Visa for instant use anywhere, bank check, physical prepaid debit card or choice of digital gift cards.
