

12 FEATURES DEVELOPERS SHOULD EXPECT FROM A PAYMENTS API

CAN OUR PAYMENTS API DO THIS?

1 EASILY EMBED PAYMENTS INSIDE ANY APP OR BUSINESS SOFTWARE

After all, any business software is better when payment-enabled.

3 OFFER A ROBUST SANDBOX

To test and retest using a complete replica of the production environment supporting all of the same API endpoints.

5 LOWER THE COST OF GLOBAL PAYMENTS

Digital wallets enable faster and cheaper payments and lower exchange rates while bypassing traditional financial institutions (banks) and card processing networks.

7 ENSURE BUILT-IN SECURITY

To provide privacy and security tools to fully protect both data and funds.

9 PROVIDE TAX REPORTING

Xtrm's payment platform automatically generates tax reporting for all Payees (including 1099-K's in the US) at no cost to them.

11 ELIMINATE THE NEED FOR STORING OR MAINTAINING PERSONAL INFORMATION

Reduces errors and eliminates unneeded hand-offs and associated costs.

2 PAY ANYONE, ANYWHERE - INSTANTLY USING DIGITAL WALLETS

Wallet-to-wallet payments are both simple and instant. No cards. No banks required.

4 DELIVER EASY TO IMPLEMENT APIS

With comprehensive Payer and Payee APIs to Fund, Send, Exchange and Transfer funds via digital wallets.

6 ENABLE MULTIPLE FUNDING SOURCES

Your clients have the choice to fund their digital wallets via ACH, wire transfer, invoice payment or card processing

8 COMPLY WITH ALL KYC AND AML REGULATORY ISSUES

Using automation and multiple layers of security and account limits.

10 ENABLE PAYEES TO LINK THEIR BANKS DIRECTLY

Providing users with better control when receiving their payments.

12 EMPOWER PAYEES TO DETERMINE HOW AND WHEN THEY'D LIKE TO RECEIVE THEIR FUNDS

Beyond bank transfer, Payees can choose to use optional Rapid Bank Transfer for instant deposit or Virtual Visa for instant use anywhere. Bank checks, physical prepaid debit cards or a choice of digital gift cards also available.
